THE ALL-NEW 2021 SIENNA

An absolute game changer.

Redefining what a minivan should be.

With a category-defining look, the all-new redesigned 2021 Sienna has arrived. This versatile and spacious 7- or 8-seater is the first-ever Sienna with Hybrid Synergy Drive powertrain that delivers proven power, outstanding fuel efficiency, tremendous strength, and all-wheel drive capabilities. The best part? Choosing a model that fits your lifestyle. And with the Toyota Mobility Program, it's available in two mobility models that can be converted for maximum accessibility.

[Click to Learn More](#)

STYLE & DESIGN

Style like never before.

Designed to be noticed.

From the outside, the Sienna is assertive at every angle. The sculpted design flows from the lower front grille all the way to the tailgate, while thin LED lights create a signature impression at the front and rear. Inside, the spacious cabin is loaded with premium features like available ventilated front seats, mood lighting at entry, handy storage capability, and an innovative console that puts everything within reach. And if you're looking for an exhilarating drive, the ultra-sporty XSE model amps up the driving experience with dark sport grille, bold front and rear bumpers, and available dark 20" alloy wheels.

[Click to Learn More](#)

VERSATILITY

First-class comfort.

Room for the entire family and then some.

Get comfortable because the Sienna LE and XLE FWD come equipped in 8-seat configurations with two captain chairs and a stowable middle seat. Meanwhile, XLE AWD, XSE and Limited feature 7 seats with long slide second-row captain chairs that provide passengers with unprecedented legroom. And with smart solutions like available hands-free Power kick sensor Back and Slide Doors, four-zone climate control, 7 USB ports, and up to 16 cup holders, every seat offers an incredible versatile experience. For greater accessibility, the Toyota Mobility Program offers two mobility models that include standard convenience features such as available power dual sliding side doors, power rear door with jam protection and more.

MOBILITY: [Click to Learn More](#)

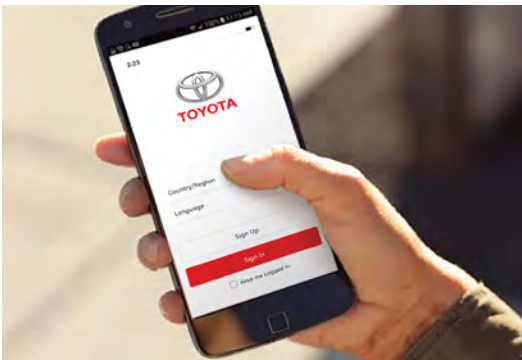

TECHNOLOGY

A smarter driving experience.

INTUITIVE TECH

Sienna offers a host of intelligent tech including a 9-inch touch screen display, Apple CarPlay™¹ and Android Auto™¹ compatibility. Available features include Qi Wireless Charging, Digital Display Rearview Mirror, and JBL® Audio with Clari-Fi™.

CONNECTED SERVICES BY TOYOTA¹

Staying connected has never been easier with a suite of available connectivity features including Remote Connect, Safety Connect®, Service Connect, and Destination Assist to help enhance your driving experience.

REAR ENTERTAINMENT DISPLAY

To keep rear seat passengers entertained during long road trips, Sienna is available with an 11.6-inch HD rear entertainment display and two wireless headphones.

BLIND SPOT MONITOR WITH REAR CROSS-TRAFFIC ALERT

Standard Blind Spot Monitor with Rear Cross-Traffic Alert uses radar technology to help identify vehicles that may not be visible when changing lanes or backing out of a parking space. When a vehicle is detected, a warning indicator illuminates on the appropriate side view mirror.

PERFORMANCE

Unexpected power.

That's right, we're talking about a minivan.

The 2021 Sienna is powerful. The Toyota Hybrid System II high-efficiency 2.5-litre DOHC engine delivers 245 total horsepower, excelling in power and fuel economy. It's the only vehicle in its class that combines a hybrid powertrain with available Electronic on-demand AWD. The Sienna also offers some performance-control surprises with selectable EV, NORMAL, ECO and SPORT driving modes to improve driving performance. And with an available towing capacity of up to 3,500 lbs (1,585 kg)², you can pull a compact travel trailer for a weekend getaway.

SAFETY

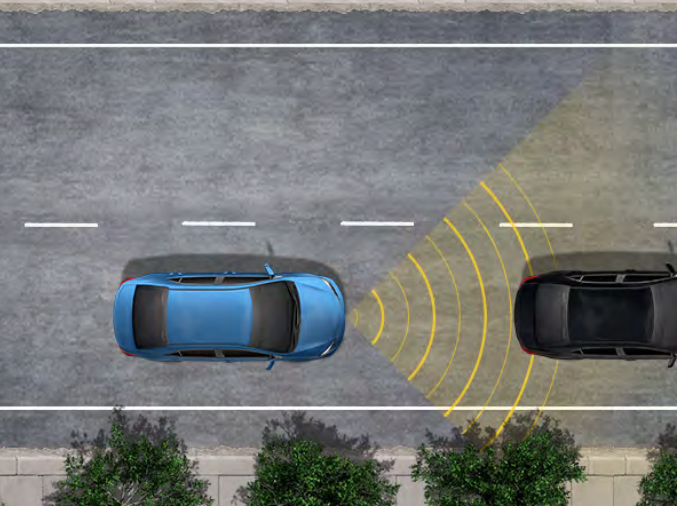

Toyota Safety Sense™

No matter what roads you travel, Toyota Safety Sense™³ 2.0 is always there to help keep you as safe as possible. It's an advanced suite of innovative safety features that comes standard on the 2021 Sienna, and it is designed to help protect drivers, passengers, pedestrians, and people in other vehicles from harm.

PRE-COLLISION SYSTEM WITH PEDESTRIAN & BICYCLE DETECTION⁴

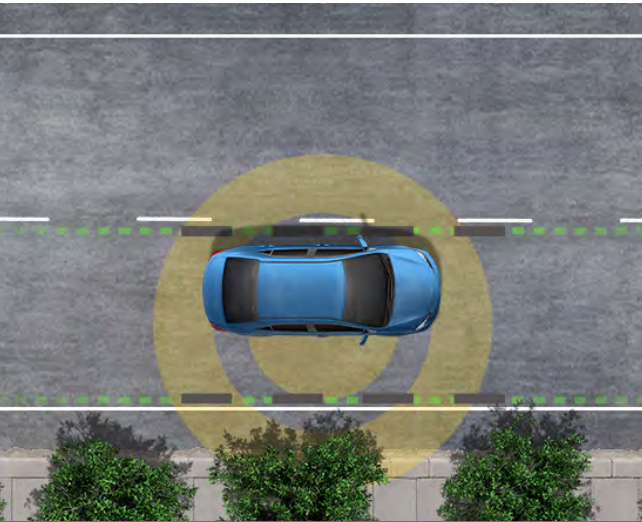

Provides collision avoidance or collision mitigation support in speed ranges where frontal collisions are likely to occur. The latest system has enhanced low-light capabilities to help detect pedestrians at night. In certain conditions during the day, the Pre-Collision System with Pedestrian and Bicycle Detection may also help to detect leading and crossing cyclists and help prevent or mitigate a collision.

FULL-SPEED RANGE DYNAMIC RADAR CRUISE CONTROL⁵

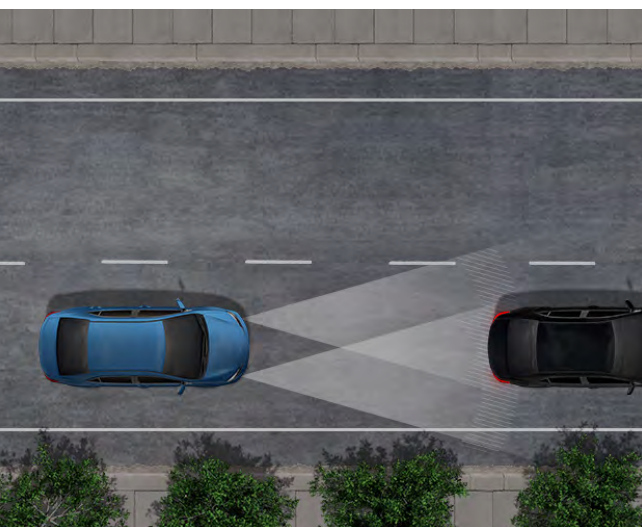

Dynamic Radar Cruise Control (DRCC) uses vehicle-to-vehicle distance control, which adjusts your speed, to help you maintain a preset distance from vehicles ahead of you that are driving at a slower speed. DRCC uses a front-grille-mounted radar and an in-vehicle camera designed to detect vehicles and their distance.

STANDARD TOYOTA SAFETY SENSE™ 2.0

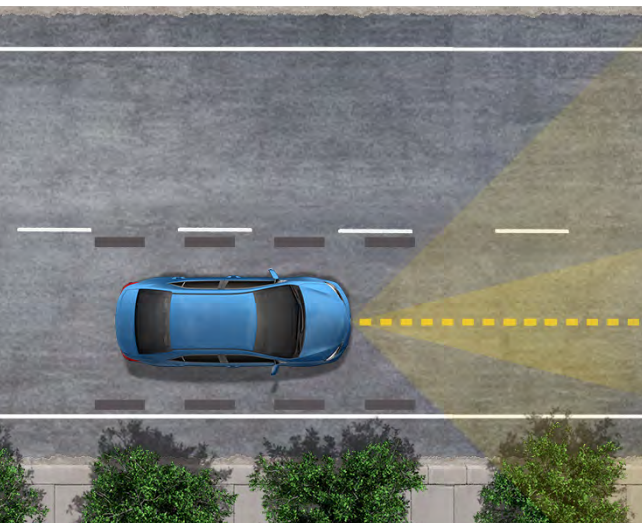

LANE DEPARTURE ALERT WITH STEERING ASSIST⁶ & ROAD EDGE DETECTION

Alerts you if you start to drift out of your lane when visible lane markings or the road edge is detected. The Steering Assist function may also provide small corrective steering inputs.

AUTOMATIC HIGH BEAMS⁷

Designed to detect oncoming and preceding vehicles' lights and depending upon the circumstances, Automatic High Beams can switch between high and low beams for you.

LANE TRACING ASSIST⁸

Provides steering support to help the driver keep the vehicle centred in its lane when Full-Speed Dynamic Radar Cruise Control is in operation.

— NEW VEHICLE WARRANTY COVERAGE —

Every Toyota Car, Truck and SUV is built to exceptional standards. And that's not idle boasting. We back it up with these Limited Warranty Coverages:

BASIC

36 months/60,000 kms whichever comes first (all components that are defective in material or workmanship excluding normal wear and maintenance items).

36 MONTHS
OR
60,000 km

HYBRID-RELATED COMPONENT COVERAGE

Hybrid-related components, including the battery control module, hybrid control module and inverter with converter, are covered for 96 months/160,000 kms.

96 MONTHS
OR
160,000 km

HYBRID BATTERY

HV battery is covered for 120 months/240,000kms, whichever comes first. Warranty coverage is subject to terms and conditions.

120 MONTHS
OR
240,000 km

POWERTRAIN

60 months/100,000 kms, whichever comes first (engine, transmission/transaxle, drive system, seatbelts and airbags).

60 MONTHS
OR
100,000 km

CORROSION PERFORATION

60 months/unlimited kms (corrosion perforation of sheet metal).

60 MONTHS
OR
UNLIMITED km

EMISSIONS

Coverages vary under Federal and Provincial regulations.

REFER TO APPLICABLE OWNER'S MANUAL SUPPLEMENT FOR DETAILS.

— D I S C L A I M E R S —

(1) Driving while distracted can result in loss of vehicle control. Some features may be locked out while the vehicle is in gear. To reduce risk of accident while driving, exercise care when using the systems (even with the voice commands) and obey all local laws concerning use of the systems while driving (as some laws prohibit the use of electronic devices while operating a vehicle). Once the Connected Services by Toyota trial subscription expires, paid enrollment is required. Apple CarPlay, iPhone and Siri are trademarks of Apple Inc. Android Auto and Google Assistant are trademarks of Google LLC. A compatible customer phone pairing is required and customers are responsible for all data charges. (2) Before towing, confirm your vehicle and trailer are compatible, hooked up and loaded properly and that you have any necessary additional equipment. Do not exceed any Weight Ratings and follow all instructions in your Owner's Manual. The maximum you can tow depends on base curb weight plus the total weight of any cargo, occupants, and added vehicle equipment. "Added vehicle equipment" includes additional standard/optional equipment and accessories added by the manufacturer, dealers, and/or vehicle owners. The only way to be certain of your vehicle's exact curb weight is to weigh your vehicle without passengers or cargo. Installation of a tow hitch receiver or other accessories located near the rear bumper may require disabling or removing the kick sensor, and the sensor operation setting in your vehicle should be turned off. See Owner's Manual for limitations. (3) Drivers should always be responsible for their own safe driving. Please always pay attention to your surroundings and drive safely. Depending on the conditions of roads, vehicles, weather, etc., the TSS systems may not work as intended. (4) The TSS Pre-Collision System is designed to help avoid or reduce the impact speed and damage in certain frontal collisions only. The Pedestrian Detection system is designed to detect a pedestrian ahead of the vehicle, determine if impact is imminent and help reduce impact speed. It is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as speed, size and position of pedestrians, driver input and weather, light and road conditions. (5) Dynamic Radar Cruise Control is designed to assist the driver and is not a collision-avoidance system or a substitute for safe and attentive driving practices. System effectiveness depends on many factors such as weather, traffic and road conditions. (6) Lane Departure Alert with Steering Assist is designed to read lane markers under certain conditions and provide visual and audible alerts and slight steering force when lane departure is detected. It is not a collision-avoidance system or a substitute for safe and attentive driving. (7) Automatic High Beam system operates at speeds above approximately 34 km/h. Factors such as a dirty windshield, variable weather, lighting conditions and hilly terrain will limit effectiveness, requiring the driver to manually turn it off. (8) Lane Tracing (Trace) Assist (LTA) is designed to read visible lane markers and detect other vehicles under certain conditions. When potential lane departure is detected, LTA provides a visual warning and either an audible alert or vibration in the steering wheel and can apply a slight steering force. It is not a collision-avoidance system or a substitute for safe and attentive driving. Effectiveness is dependent on many factors including road, weather and vehicle conditions. (9) Not all exterior and interior colour options are available for every model. (10) Fuel efficiency estimates were determined using approved Government of Canada Test Methods. Actual fuel consumption will vary based on driving habits and other factors.

Details on the above features can be found in the Owner's Manual or contact your local Toyota Dealer.

Toyota Canada Inc. Every effort has been made to ensure the specifications and equipment shown are accurate based on information available at time of publication. In some cases, certain changes in production capacity, standard equipment, options or product delays may occur which would not be reflected in this brochure. Toyota Canada Inc. reserves the right to make these changes without notice or obligation. The Toyota website toyota.ca – or your Toyota Dealer is your best source for up-to-date information.
